🐙 github.com/jsonmaur   🏀 dribbble.com/jsonmaur

I'm a self-taught designer and developer with over fourteen years of experience in a variety of languages and environments. I'm a fast learner and enjoy working with colleagues who can teach me new skills. I can be helpful in most stages of a project from concept to production, and am capable of leading a team. Can provide references upon request.

PREFERRED TECH STACK

`SWIFT` `ELIXIR` `POSTGRESQL` `SASS` `TERRAFORM` `DIGITAL OCEAN` `WHATEVER YOU USE`

EXPERIENCE

Maur & Co.
🔗 MAUR.CO
📅 MAY 2008 - PRESENT

Owner

Working with clients on designing, coding, and deploying full-stack applications. Projects have included a real-time messaging app, a banking app for native spanish speakers in the US, a virtual travel agent app, an API for hazmat first responders, and a HIPPA-compliant rest home network.

BlockIt
🔗 BLOCKITNOW.COM
📅 JUL 2021 - JUL 2022

Senior Elixir Engineer

Worked on software to improve patient access and outcomes for healthcare providers. Designed and built a LiveView app to efficienty track and manage incoming referrals and appointments, as well as an automated system for reducing "no shows" and filling cancelled appointments. Tech stack included Elixir, Phoenix, and PostgreSQL.

EXPERIENCE (CONTINUED)

Lambda School

Back-end Instructor
Taught adults of all ages and backgrounds how to code as an evening instructor in the full-stack web development program. Delivered lectures, hosted student Q&A's, provided support to teaching assistants, and assisted with program cirriculum. Taught many students who graduated from blue-collar jobs to six-figure salaries.

Timber
🔗 TIMBER.IO
📅 MAR 2018 - JUL 2018

Front-end Engineer
Worked on and helped lead the development of internal projects including a static site generator for documentation, a UI component library, and the redesigned user dashboard. Tech stack included Elixir, Node.js, React, Redux, and CSS-in-JS with Styled Components/Emotion.

Zab
🔗 ZAB.IO
📅 MAR 2016 - DEC 2016

Co-Founder, CTO
Created a CLI-based static hosting service and CDN built on top of Amazon Web Services. One of the first recipients of the Startup Ogden grant sponsored by Weber State University. Tech stack included Terraform, Docker, Nginx, Varnish, Node.js, React, and PostgreSQL.

HQ
🔗 BUILTBYHQ.COM
📅 APR 2012 - DEC 2012
   APR 2014 - MAR 2016

Senior Full-Stack Engineer/Engineering Manager
Worked on several design and development projects for web and mobile. Helped grow and lead the engineering team, performed code reviews, collaborated with team designers, and communicated with clients online and in person. Tech stack included PHP, Node.js, React, Redux, MySQL, MongoDB, AWS, and SASS/Stylus.

Czar Theory
🔗 CZARTHEORY.COM
📅 JAN 2011 - MAR 2012

Full-stack Engineer
Worked on several front-end and back-end web projects for clients under the direction of the Creative Director. Tech stack included PHP (Zend Framework/Code Igniter), jQuery, Backbone.js, MySQL, and LESS.
